

Restaurar un backup

Vamos a la opción File y arrastramos el fichero con el backup desde nuestro equipo a dicha ventana o bien pinchamos en el botón upload y seleccionamos el fichero que queremos restaurar

The screenshot shows a 'File List' window with a menu bar containing 'File' and 'Cloud Backup'. Below the menu are icons for file operations and buttons for 'Backup', 'Restore', and 'Upload...'. A search box labeled 'Find' is on the right. The main area is a table with columns: File Name, Type, Size, and Creation Time. The 'ROU0001.backup' file is selected. At the bottom, a status bar shows '4 items (1 selected)', '13.1 MiB of 15.3 MiB used', and '13% free'.

| File Name | Type | Size | Creation Time |
|--------------------------------|-----------|----------|----------------------|
| ROU0001.backup | backup | 40.0 KiB | Jan/02/1970 04:19:28 |
| flash | disk | | Jan/01/1970 00:00:21 |
| flash/auto-before-reset.backup | backup | 21.9 KiB | Jan/01/1970 00:00:22 |
| flash/skins | directory | | Jan/01/1970 00:00:19 |

The screenshot shows a 'Restore' dialog box with a 'Backup File' dropdown menu set to 'ROU0001.backup', an empty 'Password' field, and 'Restore' and 'Cancel' buttons.
